

Cleaning:

Wedding Dress Preservation and standard dry cleaning are not the same. Wedding day spills like soda, wine and cake can dry without leaving a mark, but these sugary stains, which are not dissolved during ordinary dry cleaning, will caramelize into brown spots. Did we mention sweat, makeup and hemline dirt? No problem! After your wedding, we'll clean your gown and take extra steps to remove all stains – even the ones you can't see.

Preservation:

We personally inspect your gown before it is carefully layered with acid-free tissue and preserved in a specialty wedding chest for a lovely keepsake! This chest prevents oxidation – aging and discoloration. Going beyond the gown, we offer preservation of additional items such as a veil, purse, garter, and shoes, creating a collection of wedding day mementos.

Happily ever after:

Your gown is returned to you in a beautiful preservation chest for storage or display in your home.

Environmentally-Friendly:

We have the most innovative, all-natural products and our cleaning process is eco-friendly. Our preservations are carbon neutral thanks to our donations to Carbonfund.org. These donations offset the entire carbon footprint, and are used to fund worldwide reforestation projects.

Our international guarantee includes free correction of discoloration, as well as free pressing for future use. If you pass your gown on to a friend or relative, any member of the Association of Wedding Gown Specialists will press it beforehand.

Ready to clean and preserve your dress?

You can either drop off your dress at one of our locations, or ship it right to us after your wedding for prompt cleaning and preservation.
